DETAILED ACTION

Allowable Subject Matter

Claims 21-41 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 21 and 32 have been allowed over the Miyabata et al. (2002/0021641) and Itou et al. (5870217) prior art as following:

Miyabata et al. disclose in Fig.1 all limitations of the above independent claims except for the features of a tap for tapping a predetermined percentage of electromagnetic radiation the semiconductor diode laser device is adapted to generate by stimulated emission in response to the current generated by the driver unit and an attenuator for attenuating untapped electromagnetic radiation the semiconductor diode laser device is adapted to generate by stimulated emission in response to the current generated by the driver unit.

Whereas, Itou et al. disclose in Fig 16 all limitations of the above independent claims except for the features of a current driver unit coupled to a control unit, the control unit being arranged to alter the magnitude of a current generated by the current driver unit and arranged to drive the semiconductor diode laser device and the control unit being arranged to calculate the slope efficiency based on the magnitude of the alteration of the current and the measured power of the tapped predetermined percentage of the electromagnetic radiation.

However, there is no teaching and motivation/recommendation to combine Miyabata et al. and Itou et al.

Art Unit: 2828

Claims 22-31 and 33-41 have been found allowable due to their dependency on claims 21 and 32.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
